

IN THE SPECIFICATION

Kindly amend the fourth paragraph on page 6 of the instant specification as follows:

Please substitute the following new paragraph for the fourth paragraph on page 6 of the instant specification:

Referring to Figure 6, the third embodiment of the display panel 3 is substantially the same as the first embodiment described above. However, each of the lower electrodes 11a, 11b is divided transversely into a large number of sections such as 11a' and 11b'. Each electrode section 11a' and 11b' can be energised independently by the control circuit 16. Consequently, as shown in Figure 7, 2D regions 20, in which both the thick and thin electrodes 11a' and 11b' are energised, can be mixed with 3D regions 21, in which only the thin electrodes 11b' are energised.
